Hints

1

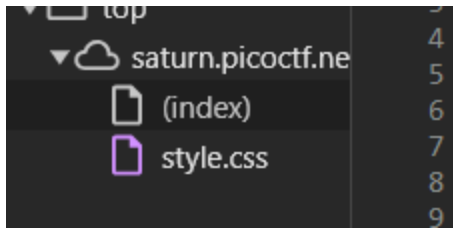

How is the password checked on
this website?

When I opened up the website, it looked something like this :

Secure Customer Portal

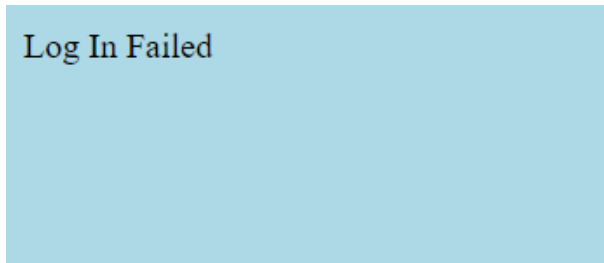

Only letters and numbers allowed for username and password.

Immediately hit inspect to see if there were any source codes that I could take advantage of :

But found nothing of use.

I tried typing in a dummy password and user, just to see what happens :

I now hit inspect on this page, and found this :

And of course :

```
function checkPassword(username, password)
{
  if( username === 'admin' && password === 'strongPassword098765' )
  {
    return true;
  }
  else
  {
    return false;
  }
}
```

I typed it into the login page and :

picoCTF{j5_15_7r4n5p4r3n7_b0c2c9cb}

Hurray! You earned 100 points.

yay
